Position Description

SENIOR MOODLE DEVELOPER

ABOUT SAFETYCARE

Safetycare is the market leader in delivering safety training video content. Safetyhub is our digital platform that gives clients access to our content, as well as helping employers rollout customised training via a tailor-made Moodle-based learning management system.

We're passionate about content. We're passionate about keeping people safe. We're looking for a similarly passionate individual who is capable of driving feature development on our platform.

We think of ourselves as the 'Netflix' for the workplace.

CORPORATE CULTURE

You won't be boxed in here. We're after someone self-motivated with great product leadership skills. Good communication of technical ideas will be key as improvement is always on the agenda. We're seeking someone who wants to maintain high levels of customer satisfaction on our platform, and is also driven to make it better. You'll be part of an eclectic and energetic team. We nurture innovation and are always receptive to new ideas.

We all share in company provided premium sporting tickets that cover all sporting events at Marvel Stadium, and all AFL games at the MCG. The wine and beer fridge is always fully stocked, and we regularly have team lunches out.

THE ROLE

This role is to ensure products and services are easy to use. It supports our mission of delivering world class online safety training.

This role ensures that our online solutions are consistent, highly available and meet all product requirements.
